

FUNCTIONALITY DOCUMENT FOR RÍSÉ APP which we'll rebrand to "FIND WORK"

Introduction:

The Service Listings feature allows freelancers, artisans, SMEs, and professionals to showcase their services so customers can easily discover, compare, and hire them. Providers can create listings with descriptions, pricing, portfolios, videos, certifications, categories, and availability schedules. The feature also supports package creation, media uploads, reviews, ratings, and AI-powered search recommendations. It integrates with the Booking System for appointments, Wallet & Payment Module for secure transactions, Live Chat for communication, Notifications for updates, and Analytics Dashboard for performance tracking.

Functional Requirements:

1 USER IDENTITY & AUTHENTICATION

Feature: User Registration & Login

Purpose

To allow users to securely create accounts and access the platform using multiple authentication methods.

Components

- Email signup
- Phone number signup
- OTP verification
- Password management
- Social login integration
- Biometric authentication
- Multi-factor authentication

Integration

- Integrates with Security Module for authentication validation
- Connects with User Role System for onboarding
- Integrates with Notification System for OTP delivery
- Connects with Fraud Detection System for suspicious login monitoring

Feature: Role-Based Onboarding

Purpose

To customize user experiences based on account type and platform activities.

Components

- Role selection interface
- Dynamic onboarding forms
- Role-specific dashboard assignment
- User preference setup

Integration

- Connects with Marketplace Modules
- Integrates with Admin Panel
- Links with Analytics System for behavior tracking

Feature: Identity Verification

Purpose

To improve trust, security, and compliance across the platform.

Components

- BVN verification
- NIN verification
- CAC verification
- Face verification
- SIM verification

Integration

- Connected to Fraud Detection Engine
- Linked with Wallet & Payments Module
- Integrated into Trust Score System

2 SERVICES MARKETPLACE

Feature: Service Listings

Purpose

To allow professionals and businesses to showcase their services.

Components

- Service title
- Pricing setup
- Portfolio uploads
- Images & videos

- Category selection
- Service description

Integration

- Connected to AI Recommendation Engine
- Integrated with Booking System
- Linked with Live Chat Module

Feature: Job Posting & Bidding

Purpose

To allow customers to post jobs while professionals compete through bids.

Components

- Job posting form
- Bid submission system
- Proposal management
- Budget settings
- Deadline setup

Integration

- Connected to Notification System
- Integrated with Escrow Payments
- Linked with AI Job Matching

Feature: Booking Management

Purpose

To manage appointment scheduling and service bookings.

Components

- Availability calendar
- Booking requests
- Booking approval/rejection
- Rescheduling system

- Booking history

Integration

- Connected with Payments Module
- Integrated with Notification System
- Linked with Analytics Dashboard

Feature: Live Communication System

Purpose

To allow direct communication between users.

Components

- Live chat
- Voice messaging
- Media sharing
- Push notifications

Integration

- Connected with Marketplace Transactions
- Linked with Order Tracking
- Integrated with Dispute Resolution

3 E-COMMERCE MARKETPLACE

Feature: Product Management

Purpose

To allow vendors to upload and manage products.

Components

- Product listing
- Product variants
- Pricing management
- Inventory tracking
- Product media uploads

Integration

- Connected with Vendor Stores
- Linked with AI Recommendations
- Integrated with Order Management

Feature: Shopping Cart & Checkout

Purpose

To simplify product purchasing for users.

Components

- Shopping cart
- Quantity management
- Coupon system
- Address management
- Checkout process

Integration

- Integrated with Payment Gateway ●
- Connected with Logistics Module ●
- Linked with Wallet System

Feature: Order Tracking

Purpose

To provide real-time order visibility.

Components

- Live order status
- Rider location tracking
- Delivery updates
- Estimated arrival time

Integration

- Connected with Logistics System ●
- Linked with Push Notifications
- Integrated with Customer Dashboard

Feature: Returns & Refunds

Purpose

To manage post-purchase disputes and refunds.

Components

- Refund request form
- Return approvals
- Refund processing
- Evidence upload

Integration

- Connected with Dispute Resolution
- Linked with Payment System
- Integrated with Admin Moderation

4 B2B WHOLESALE PLATFORM

Feature: RFQ System

Purpose

To allow businesses to request quotations from suppliers.

Components

- RFQ submission
- Supplier bidding
- Quote comparison
- Approval workflow

Integration

- Linked with Supplier Verification
- Integrated with Escrow Payments
- Connected with Invoice Management

Feature: Corporate Procurement Dashboard

Purpose

To help enterprises manage wholesale procurement.

Components

- Procurement tracking
- Supplier management
- Bulk ordering
- Invoice history

Integration

- Connected with Payment System
- Integrated with Analytics Dashboard
- Linked with Inventory System

5 LOCAL CLASSIFIEDS

Feature: Local Marketplace Listings

Purpose

To support nearby buying and selling activities.

Components

- Nearby listings
- Geo-location search
- Rental listings
- Used goods listings

Integration

- Connected with Maps API
- Integrated with Chat System
- Linked with Safety Monitoring

Feature: Meet-Up Safety Tools

Purpose

To improve user safety during local transactions.

Components

- SOS alerts
- Live location sharing
- User verification badges
- Safety reporting

Integration

- Connected with Security Module
- Linked with Admin Monitoring
- Integrated with Trust Score System

6 AI INFRASTRUCTURE

Feature: AI Job Matching

Purpose

To intelligently connect customers with suitable professionals.

Components

- Skill analysis
- Location analysis
- Budget matching
- Availability matching

Integration

- Connected with Services Marketplace
- Linked with User Profiles
- Integrated with Recommendation Engine

Feature: AI Fraud Detection

Purpose

To identify and prevent fraudulent activities.

Components

- Device tracking
- Suspicious behavior analysis
- Transaction monitoring
- Fake listing detection

Integration

- Connected with Security Module
- Linked with Payments System
- Integrated with Admin Dashboard

Feature: AI Voice Assistant

Purpose

To improve accessibility for low-literacy users.

Components

- Voice onboarding
- Voice navigation
- Multilingual support
- Speech recognition

Integration

- Connected with User Onboarding
- Integrated with Customer Support
- Linked with AI Translation System

7 PAYMENTS & FINTECH

Feature: Wallet System

Purpose

To allow users to manage funds inside the platform.

Components

- Wallet balance
- Fund transfers
- Deposits
- Withdrawals
- Transaction history

Integration

- Connected with Escrow System
- Linked with Marketplace Transactions
- Integrated with Payment Gateways

Feature: Escrow Payments

Purpose

To secure transactions between buyers and sellers.

Components

- Escrow holding
- Release approval
- Refund management
- Transaction protection

Integration

- Connected with Dispute Resolution
- Linked with Order Completion
- Integrated with Trust System

Feature: Subscription Billing

Purpose

To manage recurring platform subscriptions.

Components

- Subscription plans
- Auto-renewals
- Billing history
- Payment reminders

Integration

- Connected with Vendor Services
- Linked with Premium Features
- Integrated with Payment Providers

8 LOGISTICS & DELIVERY

Feature: Rider Management

Purpose

To manage logistics riders and delivery operations.

Components

- Rider onboarding
- Delivery assignments
- Availability status
- Earnings dashboard

Integration

- Connected with Delivery Tracking
- Linked with Order Management
- Integrated with Maps System

Feature: Route Optimization

Purpose

To improve delivery efficiency and reduce delays.

Components

- Smart routing
- Traffic monitoring
- Estimated arrival calculation

Integration

- Connected with Google Maps
- Linked with Delivery Tracking
- Integrated with AI Systems

9 SOCIAL COMMERCE

Feature: Stories & Reels

Purpose

To improve engagement and product promotion.

Components

- Short video uploads
- Stories posting
- Engagement tracking

Integration

- Connected with Vendor Stores
- Linked with Social Feed
- Integrated with Product Listings

Feature: Livestream Selling

Purpose

To allow real-time product demonstrations and sales.

Components

- Live streaming
- Live chat
- Product tagging
- Purchase links

Integration

- Connected with E-commerce Module
- Linked with Wallet System
- Integrated with Notification System

10 LEARNING & CERTIFICATION

Feature: Online Courses

Purpose

To provide digital education and skill development.

Components

- Video lessons
- Course enrollment
- Progress tracking
- Quizzes

Integration

- Connected with User Profiles
- Linked with Certification System
- Integrated with AI Learning Assistant

Feature: Internship Matching

Purpose

To connect learners with opportunities.

Components

- Internship listings
- Application management
- Skill matching

Integration

- Connected with AI Job Matching
- Linked with User Profiles
- Integrated with Notifications

11 TRUST & SECURITY LAYER

Feature: Trust Score System

Purpose

To build platform trust based on user activity.

Components

- User ratings
- Verification levels
- Transaction history
- Complaint history

Integration

- Connected with Marketplace Modules
- Linked with Dispute Resolution
- Integrated with Fraud Monitoring

Feature: Transaction Monitoring

Purpose

To monitor suspicious activities and financial risks.

Components

- Transaction scanning
- Risk analysis
- Alert generation

Integration

- Connected with Wallet System
- Linked with Fraud Detection
- Integrated with Admin Dashboard

12 DISPUTE RESOLUTION SYSTEM

Feature: Dispute Management

Purpose

To resolve conflicts between platform users.

Components

- Complaint submission
- Evidence uploads
- Refund requests
- Moderation tools

Integration

- Connected with Escrow System
- Linked with Admin Panel
- Integrated with AI Moderation

13 ADMIN PANEL

Feature: User Management

Purpose

To manage users, activities, and platform security.

Components

- User monitoring
- Account suspension
- Verification approvals
- Role management

Integration

- Connected with All Platform Modules

- Linked with Analytics System
- Integrated with Fraud Monitoring

Feature: Platform Analytics

Purpose

To provide operational insights and reporting.

Components

- Revenue reports
- User analytics
- Engagement tracking
- Financial dashboards

Integration

- Connected with All Transactions
- Linked with Marketplace Data
- Integrated with AI Predictive Analytics

14 ANALYTICS & REPORTING

Feature: Real-Time Analytics

Purpose

To monitor platform performance and user activity.

Components

- Live dashboards
- User activity reports
- Revenue analytics
- Transaction monitoring

Integration

- Connected with Admin Panel
- Linked with Marketplace Systems
- Integrated with AI Analytics Engine

Conclusion:

Find Work is a large-scale AI-powered African super app designed to combine freelancing, e-commerce, logistics, finance, learning, and business services into one unified ecosystem for individuals and enterprises. The platform focuses on scalability, security, trust, accessibility, and AI-driven automation through features such as identity verification, escrow payments, fraud detection, multilingual support, and low-literacy optimization. Built using enterprise-grade cloud infrastructure and scalable technologies, the application is designed to support millions of users while providing a seamless experience where commerce, communication, payments, education, and logistics work together in a single platform to promote financial inclusion, entrepreneurship, and digital economic growth across Africa.
